

## NEW HP 200 – Available in Transparent Colors

You've relied on HP 200 for its holding power, moisture resistance and strength to seal cartons. Now HP 200 has been enhanced with color – seven distinctive colors – providing a secure seal and a basic way to identify inventory. Even better, HP 200 colors are transparent so printed text and graphics are visible even after being covered.

You've never seen a transparent colored tape quite like this. Other tape companies lock pigment into the adhesive which weakens the seal. Shurtape locks pigment into the film. So our unique hot melt adhesive on HP 200 Colors is as strong as you'd expect.

You can count on a strong, secure seal each and every time.

Available in machine and hand rolls:  
48mm x 100m  
48mm x 914m

Holding Power to Fiberboard	15,000 minutes
Tensile Strength	27 lbs/in width
Adhesion to Stainless Steel	44 oz/in
Thickness	1.9 mils
Elongation	130 %
Application Temperature Range	20 to 150° F
Service Temperature Range	35 to 110° F

**Shurtape** | HOLD STRONG.
